SUMMARY

Senior DevOps & Site Reliability Engineer with 7+ years of experience designing, automating, and operating cloud-native platforms across AWS and Azure. Proven expertise in Kubernetes, Terraform, CI/CD automation, observability, incident management, and production reliability. Experienced in supporting enterprise-scale banking, aviation, and SaaS environments while delivering high availability, reducing cloud costs, accelerating deployments, and improving operational efficiency. Strong background in platform engineering, cloud migration, infrastructure as code, and SRE best practices.

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Multi-Cloud Architecture

Containers & Orchestration: Kubernetes (EKS, AKS), Docker, ArgoCD, Container Security

Infrastructure as Code: Terraform, Ansible, CloudFormation

CI/CD & Automation: Jenkins, GitLab CI, Azure DevOps

Observability & SRE: Prometheus, Grafana, ELK Stack, Dynatrace, AppDynamics

Operating Systems: Linux (Redhat, Ubuntu, CentOS)

Databases: MySQL, PostgreSQL, DynamoDB

Ticketing tool: Jira, ServiceNow

Scripting Languages: Bash, Groovy, YAML

Version Control System: Git

EXPERIENCE

Senior Associate – Site Reliability Engineering

Nov 2025 – Present

Cognizant Technology Solutions

Client: Alaska Airlines

- Architected and supported multi-cloud environments across AWS and Azure, improving platform reliability and reducing annual cloud costs by 40%.
- Built and managed 10+ production Kubernetes clusters across EKS and AKS environments.
- Implemented Dynatrace-based observability and proactive alerting for Kubernetes and Linux workloads.
- Developed 25+ Grafana dashboards for infrastructure and application monitoring, improving SLA compliance from 98.5% to 99.9%.
- Defined and monitored SLOs, SLIs, and Golden Signals including latency, traffic, errors, and saturation.
- Collaborated with engineering, operations, and business teams to improve service reliability, reduce incidents, and support production readiness initiatives.
- Led work tracking, sprint planning, and delivery coordination using Azure Boards.
- Supported production workloads across multi-cloud environments while maintaining high availability and reliability targets for business-critical airline services.

Senior Site Reliability Engineer (Contract)

Apr 2025 – Jul 2025

Stratosphere IT Services Pvt Ltd

Client: Lloyds Bank

- Managed production incidents and platform reliability using ServiceNow, Dynatrace, and Kibana.
- Reduced incident resolution time by 35% through automated log analysis and monitoring improvements.
- Diagnosed and resolved Kubernetes cluster performance bottlenecks and container resource utilization issues.
- Implemented blue-green and canary deployment strategies using Jenkins and GitLab CI/CD.
- Enabled zero-downtime deployments for business-critical applications.

Cloud Operations Engineer

Aug 2023 – Mar 2025

PegaSystems India

Client: Commonwealth Bank

- Managed AWS cloud infrastructure supporting enterprise-scale production environments.
- Automated infrastructure provisioning using Terraform and CloudFormation.
- Improved cloud utilization and operational efficiency across 100+ AWS accounts.
- Implemented monitoring and alerting solutions using Prometheus and Grafana, reducing incident response time by 30%.
- Conducted vulnerability assessments and implemented cloud security best practices.
- Partnered with development teams to improve deployment reliability and DevOps adoption.
- Delivered SRE workshops and operational best practices training sessions.
- Participated in client-facing engagements, planning, and SLA-driven delivery activities.

Senior Product Engineer

Oct 2022 – Jul 2023

LTIMindtree Limited

- Automated infrastructure provisioning using Ansible, reducing manual effort by 50%.
- Designed and maintained CI/CD pipelines using Jenkins, Docker, Git, and Kubernetes.
- Improved deployment reliability and release efficiency through pipeline optimization.
- Administered Azure resources including virtual machines, storage, identity management, and network security.
- Managed containerized applications on Kubernetes ensuring scalability and availability.
- Implemented centralized logging and monitoring solutions for proactive issue detection.
- Collaborated with cross-functional teams to resolve production issues and improve service performance.

Senior Software Engineer

Sep 2021 – Oct 2022

Novigo Solutions India Pvt Ltd

- Designed and implemented CI/CD pipelines reducing deployment time by 70%.
- Automated application delivery processes using Jenkins and Azure DevOps.
- Built and deployed containerized microservices applications on Kubernetes.
- Implemented Infrastructure as Code using Terraform and CloudFormation.
- Integrated SonarQube security scanning, reducing application vulnerabilities by 60%.
- Managed Git workflows, branching strategies, and release processes.

DevOps Engineer

Mar 2019 – May 2021

Simplify360 India Pvt Ltd

- Managed AWS infrastructure including EC2, S3, RDS, IAM, Auto Scaling, and Load Balancers.
- Implemented Docker and Kubernetes-based deployment platforms.
- Developed Jenkins CI/CD pipelines to automate application delivery.
- Automated Java application builds and deployment processes using Maven and Tomcat.
- Implemented Git branching and version control strategies.
- Supported production troubleshooting, monitoring, and application performance optimization.
- Collaborated directly with customers to resolve platform and application issues.
- Built Docker images and deployment automation workflows.

EDUCATION

Master of Computer Applications (MCA)

Visvesvaraya Technological University

2018

Bachelor of Science in Computer Science

Bangalore University

2016

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (In-Progress)
- Dynatrace Essentials Certification
